

Open terminal client to Matrix.

Create a file called "evalquiz.txt" and answer the following question.

Submit you quiz as follows:

~fardad.soleimanloo/submit evalquiz<ENTER>

- 1- Implement the strcpy function like what we have in string.h

```
Strcpy(char* des, const char* src);
```

```
Strcpy(char des[], const char src[]);
```

- 2- Write a function that adds 10 to the value of an integer without returning anything.

```
void addTen(whatever....);
```

- 3- **struct box{**

```
    int H;
```

```
    int W;
```

```
    int L;
```

```
}
```

Write a function that sets the H, W and L of a Box to values received from argument list:

```
void setbox(struct box* B, int H, int W, int L);
```

- 4- Write a function that copies the contents of an array of boxes to another array of boxes by receiving the two arrays and their size as arguments.

```
void copyBoxes(whatever....., int size);
```

Enter this command to submit

~fardad.soleimanloo/submit evalquiz<ENTER>
